

# Pendants

Pendants have timeless elegance and are available in a large range of classical and avant-garde cuts and shapes, as well as many colors and effects. Pendants offer a whole range of design possibilities for different segments thanks to their easy application, with the top hole requiring only a jump ring/pinch bail with a chain or cord. Due to the diverse range of sizes available, Pendants are ideal for creating jewelry sets such as necklaces, bracelets, and earrings as well as apparel and accessories.

Please note that the article (6228) displayed here is only meant as a reference and isn't available in all of the colors/effects as standard. For details on available colors and effects for each article within the product groups, please see the product matrix of the respective item in the Collection 2021. For color and effect samples, please refer to Beads Color Chart.

The plating resistance of effects is tested according to Swarovski's plating guidelines (SWAROVSKI.COM/S-PROFESSIONALS). Customers are advised to carry out their own tests if their plating parameters diverge from Swarovski plating guidelines.

\* Crystals are not resistant to plating and similar processing.

\*\* Crystals are resistant to plating only if they are F-foiled.

<sup>1</sup> Majestic Blue's intense ultramarine hue is difficult to recreate accurately in print due to the fact that the CMYK color spectrum is used in the printing process. In order to get a truer impression of its color, please use RGB digital pictures or, ideally, ask for actual samples.

**Classic Colors/Effects:** This color range offers a wide choice of traditional Swarovski crystal colors and effects.

**Exclusive Colors/Effects:** This color range is offered exclusively by Swarovski.

Colors and effects can appear different when illuminated with different light sources. Swarovski uses standard light source D50 for color decision and comparison. Slight changes in shades are unavoidable. Colors may vary according to cut and foiling.

The composition of Advanced Crystal is compliant with regulatory industry norms and laws regarding the restriction or prohibition of certain substances in the most relevant segments of our customers. Please note that the compliance of the crystal colors Light Siam and Siam varies according to certain industry regulations. Those regulations are indicated with \* in the compliance overview. Indian Siam and Scarlet (option to Lt. Siam) conform to all CLEAR-lists. For further information please visit [swarovski.com/s-professionals](http://swarovski.com/s-professionals)

1 Front view 2 Side view 3 Back view

"1 Front view" or "3 Back view" shaded in gray: surface effect is applied to this side.

"2 Side view" shaded in gray: side of surface effect not defined (for all symmetrical and some asymmetrical articles).

Where all views are shaded in gray, the effect is applied over the entire marked surface.

1 Front view 2 Side view 3 Back view

"1 Front view" or "3 Back view" shaded in gray: the surface effect is applied to this side.

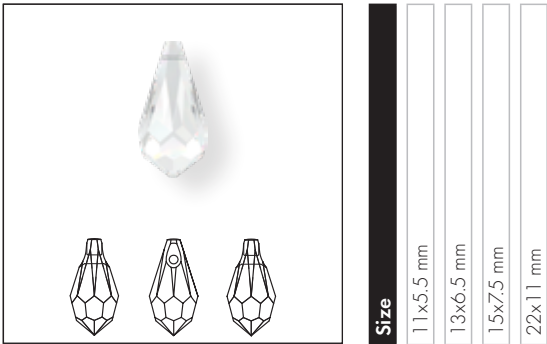

"2 Side view" shaded in gray: side of surface effect not defined (for all symmetrical and some asymmetrical articles).

6721: 16, 20 mm: no defined side for surface effect; 28, 40 mm surface effect on "3 Back view."

6864: Reverse effect "V" is the standard version and is therefore shaded.

# Maison Margiela for Swarovski

## CRYSTALACTITE PENDANTS

Since 1988, Paris-based Maison Margiela has become famous for its collaborative team-led approach and its avant-garde transformation of classic designs. In July 2013, it presented the Maison Margiela Crystalactite for Swarovski at its Paris Haute Couture show. These were groundbreaking Crystal Fusion components inspired by natural stalactite forms and developed in creative partnership with Swarovski. Swarovski presents its interpretation of this innovative cut in pure crystal – the Crystalactite Pendant. Featuring a progressive aesthetic combining partly frosted facets with primeval, irregular

icicle shapes, the vision that originated in our wildest landscapes has now been perfected by one of the most sophisticated design houses. With an easy-to-use hole at the top, the Pendant offers myriad design possibilities for strong, contemporary designs, and for recreating haute-couture looks.

**“Naturally and spontaneously, an imposing crystal emerges from its raw, stony origin, patiently growing into its iconic stalactite shape.”**

# ”Love Story of the Heart“ by Manish Arora

Since the beginning of his international career, the award-winning, Delhi-based designer Manish Arora has worked creatively with Swarovski. In 2009, he created a memorable collection of crystalline Transfers. One year later, India's best-loved and most prolific design talent renewed his partnership with Swarovski and created a special collection of heart-shaped crystal pendants, which were launched in February 2011. Each individual piece is an expression of love's different emotional states and is named accordingly.

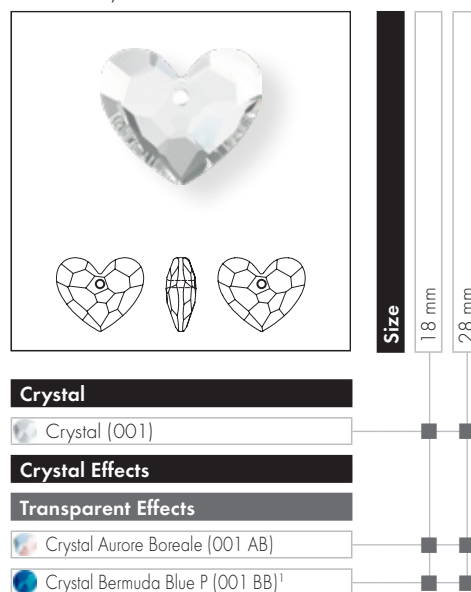

The partnership with Manish Arora is symbolic of how Swarovski engages in mutually rewarding creative partnerships with the world's best and brightest design spirits.

“The heart shape is very close to me because it is the universal symbol of love. I wanted to bring this symbol to life by creating a collection of crystal pendants and I hope people will wear them as a personal expression of the beauty and purity of this emotion.” Manish Arora

# Ocean Mysteries designed by Céline Cousteau

**Design Story:** A love for the sea runs through her veins: Céline Cousteau is a celebrated filmmaker, humanitarian, and environmentalist, as well as the granddaughter of legendary ocean explorer Jacques-Yves Cousteau. She presents her first ever crystal designs for Swarovski, inspired by one of her favorite places, the depths of the ocean. Taking inspiration from nature itself and leaving its

beauty unaltered, her stunningly life-like creatures are not only captivating and spellbinding, they also draw attention toward the mysterious, mostly unseen, and unexplored world beneath the ocean's surface on which all ocean life depends. These mysteries need to be protected for future generations, both above and below the water.
