

SYNTHETICS

These versatile products combine elegant crystals from Swarovski with different gluing systems, each optimized for certain carrier materials and fields of application. Synthetic products are ideal for use in the textiles, interior design, jewelry, DIY, and accessories segments and offer numerous sparkling design possibilities.

Crystal Rocks, Crystal Fine Rocks and Crystal Ultrafine Rocks, are innovative and stunning design elements that showcase different sizes of double-pointed chatons.

Crystal Fabric is another inventive product that consists of a carrier material that is completely covered with millions of tiny cut and uncut crystals.

Crystaltex Bandings are available in a wide range of colors and effects, making them the perfect choice for creating a full spectrum of designs.

Small XILLION Chatons turn Crystaltex Chaton Bandings into an exciting and luxurious statement in the fashion world.

Crystal Medley & Crystal Galuchat – A brilliant design choice. These Swarovski inventions emulate naturally grown forms, adding a mysteriously organic effect to glamorous and progressive styles.

Graphic Fabric/Ultrafine Rocks/Fine Rocks/Rocks – have your image taken in crystal. This new graphic technology opens up a world of endless design possibilities.

SYNTHETICS

AVAILABLE SYNTHETIC PRODUCTS AND FIELDS OF APPLICATION

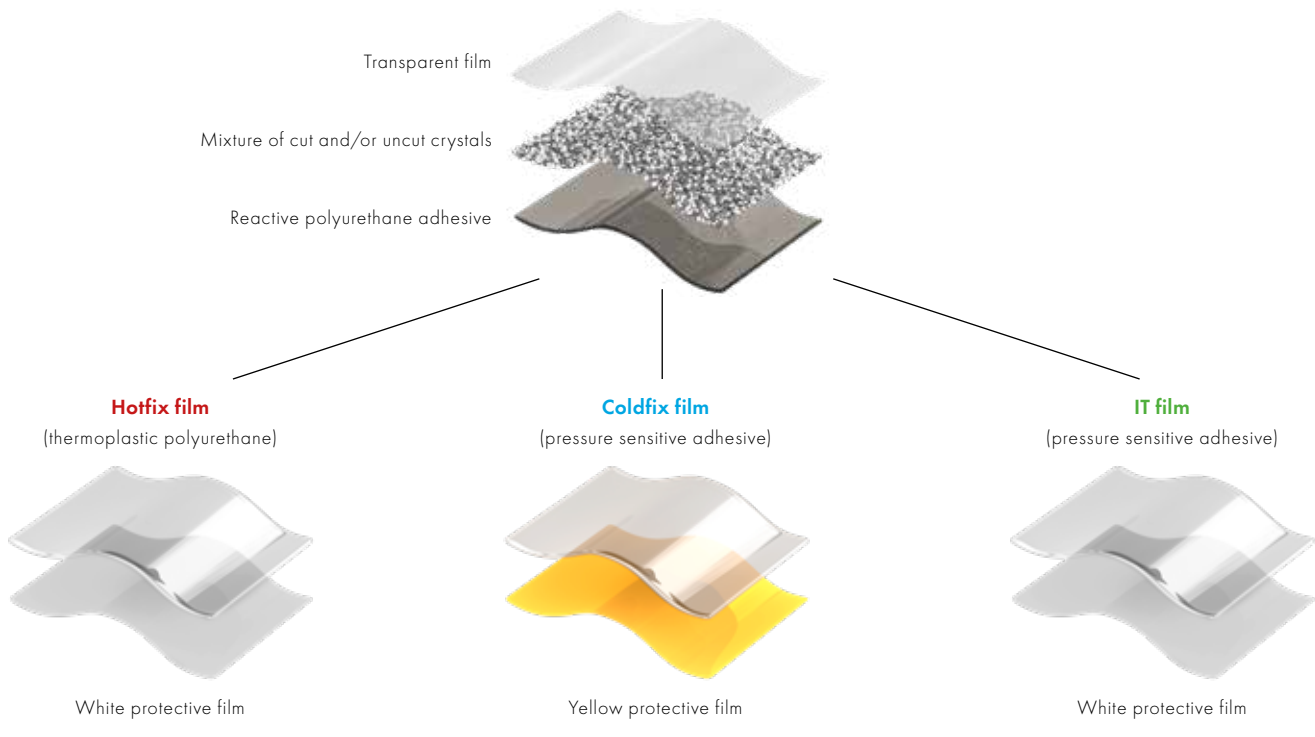

Synthetics combine elegant crystals from Swarovski with different adhesive systems already applied on the reverse side of the product, each optimized for certain carrier materials and fields of application. They are ideal for use in textiles, interior, jewelry, and DIY, as well as in the accessories

segment, and offer numerous sparkling design possibilities.

Due to its outstanding bonding performance, Synthetic **Hotfix** is perfect for a variety of textile applications with high performance requirements. Synthetic **Coldfix**, however, is a product developed especially for

materials that are not suitable for Hotfix applications, such as real and artificial leather and functional fabrics.

Synthetic **IT** products, on the other hand, are ready to apply and perfect for solid materials such as paper, metal and glass, allowing easy and fast application.

- Application on carrier materials which are suitable for Hotfix application. (e.g. cotton/ polyester blend, denim, Alcantara®,...)

- Heat-sensitive carrier materials (e.g. silk, cashmere, real and artificial leather ...)
- Pressure-sensitive carrier materials (e.g. wool, real and artificial leather ...)
- Textiles with a low level of absorbency (e.g. functional fabrics with water-repellent coating, ...)
- Easy and fast embellishment of finished products

- Solid materials such as glass, metal, paper, etc.

To ensure the best possible result, test applications on the intended carrier material are strongly recommended. For information especially regarding material limitations please refer to our Application Manual.

Any oral, written, or test-based advice that Swarovski provides regarding techniques for the application of its products are recommendations based on Swarovski's current knowledge and

the information provided by its suppliers. **Such advice does not discharge customers from carrying out their own tests on techniques they propose to use, and the suitability**

of these techniques for the intended application. The application, use and processing of these techniques and products are solely the user's responsibility.

GRAPHIC FABRIC, ULTRAFINE ROCKS, FINE ROCKS & ROCKS

Synthetics such as Crystal Rocks, Crystal Fine Rocks, Crystal Ultrafine Rocks, and Crystal Fabric combine elegant crystals from Swarovski with synthetic carrier materials that can be applied using Hotfix or IT (self-adhesive) technology. They are ideal for use in the textiles, interior design, jewelry, and accessories segments.

GRAPHIC FABRIC, ULTRAFINE ROCKS, FINE ROCKS & ROCKS

Taking the word "image" from "imagination" and leading it to new creative heights, Swarovski presents a new graphic technology that opens up a world of design possibilities - in an unprecedented richness of detail!

The Graphic products allow for the printing of individual motifs - such as pictures, graphics, logos, or lettering - onto customer favorites Crystal Fabric, Crystal Rocks, Crystal Fine Rocks, and Crystal Ultrafine Rocks.

The two different printing methods, either on top of or underneath the crystal, or a combination of the two, enrich your personal motif with a sparkling 3D surface for stunning effects in a series of application fields.

As a true highlight and stunning innovation in our assortment, the Graphic Fabric, Ultrafine Rocks, Fine Rocks, and Rocks speak to the rising demand for personalized design items, emphasizing our desire for an individual look in a world of mass production.

GRAPHIC OFFERS DIFFERENT PRINTING METHODS:

Foil Print (FP)

The motif is printed on the foil below the crystal, which means...

- The brilliance of the crystal remains
- Blurred contours can be used as a design element, e.g. for mille-fleurs motifs

Glass Print (GP)

The motif is printed on crystal, which means...

- Highly precise reproduction of the motif, even of tiny details and small fonts
- No blurring occurs
- Matt effect can be used as a design element

Combination of Foil & Glass Print (FP&GP)

- Spectacular depth effects
- Highlighting special features of the design

INFORMATION ON GRAPHIC FABRIC

SPECIAL MOTIF SERVICE

A special motif is a design created by the customer that differs to the Graphic Fabric, Ultrafine Rocks, Fine Rocks & Rocks Standard Collection. This service opens up an abundance of customization possibilities and enables you to benefit from Swarovski's long-standing experience and design expertise. A range of customization options for existing motifs is available (see "Customization Possibilities" below).

You can also submit design sketches that meet your personal requirements, such as a brand image or an image for a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which means that adjustments can be made easily according to your needs.

Required information for Graphic Fabric, Ultrafine Rocks, Fine Rocks & Rocks

data format contour/outline	vector graphics (.dxf, .ai, .eps, .dwg)
data format picture	raster image format (.tiff, .pdf, .psd, .png) / vector format (.ai, .eps, .pdf)
picture resolution & size	min. 300dpi (real size)
colors	RGB or CMYK
fonts	convert text to paths/outlines

Due to the different print methods (print on foil or glass), the colors may vary. Please be aware that possible color variations are more visible on single-color motifs than on images with many different

colors. If you require information and possible print tolerances (offset, color tolerance, etc.) please contact Swarovski and an application request will be entered into our application database.

Customization Possibilities for Graphic Fabric, Ultrafine Rocks, Fine Rocks & Rocks

	GRAPHIC FABRIC	GRAPHIC ULTRAFINE ROCKS	GRAPHIC FINE ROCKS	GRAPHIC ROCKS
Max. motif size	400x330 mm	400x330 mm	400x330 mm	400x330 mm
Min. motif size	10x10 mm (or effective surface of 1 cm ²)	15x15 mm (or effective surface of 2.25 cm ²)	15x15 mm (or effective surface of 2.25 cm ²)	15x15 mm (or effective surface of 2.25 cm ²)
Min. width of gaps within motifs	3 mm	3 mm	3 mm	3 mm
Min. product surface	3 mm	3.4 mm	4 mm	9 mm
Min. size of the smallest element within a motif	10x10 mm (or effective surface of 1 cm ²)	15x15 mm (or effective surface of 2.25 cm ²)	15x15 mm (or effective surface of 2.25 cm ²)	15x15 mm (or effective surface of 2.25 cm ²)

Due to production requirements, motifs with edges and angles of less than 90° need to be rounded off.

Ordering Process

Send your request with the drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements for the desired motif. Please also indicate which product group your special motif applies to (Graphic Fabric, Ultrafine Rocks, Fine Rocks & Rocks).

You will then receive a quotation including your article number, minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes are required.

Your special motif will be produced and delivered following your confirmation.

Important information

Please always submit the drawing of your desired motif in the actual size you require. When enlarged to the desired size, a small sketch will have blurred lines that will make it difficult to correctly reproduce. Full-scale pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP, or DXF format will ensure that we have clear data to work with. These can also be sent via email or on CD-ROM. If sending a sewing pattern, please include the whole pattern and not just sections. If the sketch is submitted as a hard copy by fax or email, please include a scale legend (e.g. copy/scan with a ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

Due to the tolerance level of the crystals being applied onto carrier film, the final Graphic Fabric, Ultrafine Rocks, Fine Rocks, and Rocks motifs may slightly differ from the sketches or prints in relation to the motifs' outline. Therefore the product may be subject to individual variations with each reproduction. These variations are caused by technical production-related factors. As these variations are not deemed to be defects, warranty claims are excluded and Swarovski assumes no liability whatsoever in connection with them.

If detailed information on possible tolerances (e.g. cavity production for metal parts) and print tolerances is required (offset, color tolerance, etc.), please contact Swarovski and an application request will be placed in our application database.

If considered feasible, special productions are generally offered to all our customers. Please note: special productions are subject to acceptance by Swarovski and ordering a design does not automatically grant exclusive production of this design for the customer.

For detailed application information, please refer to the Application Manual and our business website SWAROVSKI-PROFESSIONAL.COM or contact your Swarovski sales office.

Please take care with deep-colored fabrics and artificial leather (e.g. denim and alcantara). Some fabrics may bleed after application or washing. If detailed information is required (product information), please contact Swarovski, who will enter an application request into our application database.

CRYSTAL FABRIC BANDINGS

CRYSTAL FABRIC

Crystal Fabric is another inventive product to make a luxurious statement within a variety of different segments, for example textiles, accessories, jewelry, eyewear, and watches. Depending on the color and surface of the carrier material, Crystal Fabric with

transparent film changes its look dramatically. Crystal Fabric on a black film creates a deep, mysteriously soft gleam, dressed up with a very alluring sparkle.

SPECIAL MOTIF SERVICE

A special motif is any individual design created by the customer that differs to the Crystal Fabric Standard, Crystal Inspiration, or Special Collections. This service opens up an abundance of customization possibilities and enables you to profit from Swarovski's long-standing experience and design expertise. A range of customization options for existing motifs is available (see "Customization Possibilities" below).

You can also submit design sketches that meet your special requirements, such as a brand image or an image for a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which means that adjustments can be made easily according to your needs.

Customization Possibilities for Crystal Fabric

- Max. motif size: 600x1800 mm
- Min. motif size: of 10x10 mm or effective surface of 1 cm²
- Min. width of gaps within motifs: 3 mm
- Min. Crystal Fabric surface: 3 mm
- Min. size of the smallest element within a motif: 10x10 mm or effective area of 1 cm²

Ordering Process

Send your request with the drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements for the desired motif. Please also indicate which product group your special motif applies to (Crystal Fabric). You will then receive a quotation including your article number,

minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes need to be made. Your special motif will be produced and delivered following your confirmation.

Please Note

Please always submit the drawing of your desired motif to represent it in the actual size you require. A small sketch, when enlarged to the desired size, will have blurred lines that will make it difficult to correctly reproduce. Pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP, or DXF format will ensure that we have clear data to work with. These can also be sent via email or on CD-ROM. If sending a sewing pattern, please include the whole pattern and not just sections. When the sketch is submitted as a hard copy by fax or email, please include a scale legend (e.g. copy/scan with a ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

It is generally possible to draw motifs with a minimum gap of 3 mm between the outlines. However, due to the tolerance level of the crystals being applied onto carrier film, the final Crystal Fabric motifs may differ from the sketches or prints in relation to

the motifs' outline, especially with spaces that are smaller than 3 mm. Therefore the motif, and by extension, the product itself, may be subject to individual variations with each reproduction. These variations are caused by technical production-related factors. As these variations are not deemed to be defects, warranty claims are excluded and Swarovski assumes no liability whatsoever in connection with them.

Special productions are generally offered to all our customers if these are deemed to be feasible and comply with our General Terms and Conditions. Please note that ordering of a design does not grant exclusive production of this design to the customer.

If detailed information on possible tolerances is required (e.g. cavity production for metal parts), please contact your local Swarovski sales office who will enter an application request into our application database.

CRYSTAL ROCKS

The surface and edges of the innovative and luxurious Crystal Rocks are smooth, which offers a whole new range of application possibilities. Crystal Rocks not only creates unique effects on accessories and jewelry, but also enhances textiles in an innovative way.

SPECIAL MOTIF SERVICE

A special motif is a design created by the customer that differs to the Crystal Rocks Standard Collection. This service opens up an abundance of customization possibilities and enables you to profit from Swarovski's long-standing experience and design expertise. A range of customization options for existing motifs is available (see "Customization Possibilities" below). You can also submit

design sketches that meet your special needs, such as a brand image or an image to suit a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which means that adjustments can be made easily according to your needs.

Customization Possibilities for Crystal Rocks

- Min. size: 15x15 mm or effective surface of 2.25 cm²
- Max. size: 400x330 mm
- Min. Crystal Rocks surface: 9 mm
- Min. width of gaps within motifs: 3 mm
- Min. size of smallest element within a motif: 15x15 mm or effective area of 2.25 cm²

Due to production requirements, motifs with edges and angles of less than 90° need to be rounded off. Tolerance value = 3 mm.

Ordering Process

Send your request with the drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements for the desired motif. Please also indicate which product group your special motif applies to (Crystal Rocks). You will then receive a quotation including your article number,

minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes need to be made. Your special motif will be produced and delivered following your confirmation.

Please Note

Please always submit the drawing of your desired motif to represent it in the actual size you require. A small sketch, when enlarged to the desired size, will have blurred lines that will make it difficult to correctly reproduce. Pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP, or DXF format will ensure that we have clear data to work with. These can also be sent via email or on CD-ROM. If sending a sewing pattern, please include the whole pattern and not just sections. When the sketch is submitted as a hard copy by fax or email, please include a scale legend (e.g. copy/scan with a ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

It is generally possible to draw motifs with a minimum gap of 10 mm between the outlines. However, due to the tolerance level of the crystals being applied onto carrier film, the final Crystal Rocks motifs may differ from sketches or prints in relation

to the motifs' outline, especially with regards to spaces that are smaller than 10 mm. Therefore the motif, and by extension, the product itself, may be subject to individual variations with each reproduction. These variations are caused by technical production-related factors. As these variations are not deemed to be defects, warranty claims are excluded and Swarovski assumes no liability whatsoever in connection with them.

Special productions are generally offered to all our customers if these are deemed to be feasible and comply with our General Terms and Conditions. Please note ordering of a design does not grant exclusive production of this design to the customer.

If detailed information on the possible tolerances is required (e.g. cavity production for metal parts), please contact your local Swarovski sales office who will enter an application request into our application database.

CRYSTAL FINE ROCKS

Fans of filigree designs will love Crystal Fine Rocks. Small, double-pointed Chatons create a refined surface structure and flexible texture that is thin and lightweight. Available in a wide selection, the washable Crystal Fine Rocks is set to become the star design element across all segments.

SPECIAL MOTIF SERVICE

A special motif is a design created by the customer that differs to the Crystal Fine Rocks Standard Collection. This service opens up an abundance of customization possibilities and enables you to profit from Swarovski's long-standing experience and design expertise. A range of customization options for existing motifs is available (see "Customization Possibilities" below). You can also

submit design sketches that meet your special needs, such as a brand image or an image for a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which means that adjustments can be made easily according to your needs.

Customization Possibilities for Crystal Fine Rocks

- Min. size: 15x15 mm or effective surface of 2.25 cm²
- Max. size: 400x330 mm
- Min. Crystal Fine Rocks surface: 4 mm¹
- Min. width of gaps within motifs: 3 mm
- Min. size of the smallest element within a motif: 15x15 mm or effective surface of 2.25 cm²

Ordering Process

Send your request with the drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements for the desired motif. Please also indicate which product group your special motif applies to (Crystal Fine Rocks). You will then receive a quotation including your article number,

minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes need to be made. Your special motif will be produced and delivered following your confirmation.

Please Note

Please always submit the drawing of your desired motif to represent it in the actual size you require. A small sketch, when enlarged to the desired size, will have blurred lines that will make it difficult to correctly reproduce. Pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP, or DXF format will ensure that we have clear data to work with. These can also be sent via email or on CD-ROM. If sending a sewing pattern, please include the whole pattern and not just sections. When the sketch is submitted as a hard copy by fax or email, please include a scale legend (e.g. copy/scan with a ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

It is generally possible to draw motifs with a minimum gap of 10 mm between the outlines. However, due to the tolerance level of the crystals being applied onto carrier film, the final Crystal Fine Rocks Motifs may differ from sketches or prints in relation

to the motifs' outline, especially with regards to spaces that are smaller than 10 mm. Therefore the motif, and by extension, the product itself, may be subject to individual variations with each reproduction. These variations are caused by technical production-related factors. As these variations are not deemed to be defects, warranty claims are excluded and Swarovski assumes no liability whatsoever in connection with them.

Special productions are generally offered to all our customers if these are deemed to be feasible and comply with our General Terms and Conditions. Please note ordering of a design does not grant exclusive production of this design to the customer.

If detailed information on the possible tolerances is required (e.g. cavity production for metal parts), please contact your local Swarovski sales office who will enter an application request into our application database.

¹ Bandings (strips over 100mm in length) in 5mm widths cannot be produced.

CRYSTAL ULTRAFINE ROCKS

Small, double-pointed PP9 Chatons create a refined surface structure and flexible texture that is thin and lightweight. Available in a wide selection, Crystal Ultrafine Rocks is set to become the star design element across all segments.

CRYSTAL GALUCHAT

Tactility continues to be a core topic for design as people seek a sense of re-engagement in an overly digitalized world. The ethereal beauty and haptic nature of the incomparable Crystal

Galuchat reconnects our sense of touch whilst offering a glimpse of mystery and otherworldly magic.

SPECIAL MOTIF SERVICE

A special motif is a design created by the customer that differs to the Crystal Galuchat Standard Collection. This service opens up an abundance of customization possibilities and enables you to profit from Swarovski's long-standing experience and design expertise. A range of customization options for existing motifs is available (see "Customization Possibilities" below). You can also

submit design sketches that meet your special needs, such as a brand image or an image for a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which means that adjustments can be made easily according to your needs.

Customization Possibilities for Crystal Galuchat

- Min. size: 19x19 mm or effective surface of 3.61 cm²
- Max. size: 400x330 mm
- Min. Crystal Galuchat surface: 9 mm
- Min. width of gaps within motifs: 7x7 mm or effective surface of 0.49 cm²
- Min. gap between motif outlines: 6 mm

Due to production process requirements, motifs with edges and angles of less than 90° need to be rounded off. Tolerance value = 1.5 mm.

Two-colored motifs

Customers are able to create a combination out of the Crystal Galuchat standard color assortment (e.g. large and small crystal balls in 001 AB and the round uncut elements in 001 CAL).

It is not possible to mix three different colors - both crystal balls (3.5 and 2.5 mm) must be the same color.

Ordering Process

Send your request with the drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements for the desired motif. Please also indicate which product group your special motif applies to (Crystal Galuchat). You will then receive a quotation including your article number,

minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes need to be made. Your special motif will be produced and delivered following your confirmation.

Please Note

Please always submit the drawing of your desired motif to represent it in the actual size you require. A small sketch, when enlarged to the desired size, will have blurred lines that will make it difficult to correctly reproduce. Pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP, or DXF format will ensure that we have clear data to work with. These can also be sent via email or on CD-ROM. If sending a sewing pattern, please include the whole pattern and not just sections. When the sketch is submitted as a hard copy by fax or email, please include a scale legend (e.g. copy/scan with a ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

It is generally possible to draw motifs with a minimum gap of 10 mm between the outlines. However, due to the tolerance level of the crystals being applied onto carrier film, the final Crystal Galuchat motifs may differ from sketches or prints in relation to

the motifs' outline, especially with regards to spaces that are smaller than 10 mm. Therefore the motif, and by extension, the product itself, may be subject to individual variations with each reproduction. These variations are caused by technical production-related factors. As these variations are not deemed to be defects, warranty claims are excluded and Swarovski assumes no liability whatsoever in connection with them.

Special productions are generally offered to all our customers if these are deemed to be feasible and comply with our General Terms and Conditions. Please note ordering of a design does not grant exclusive production of this design to the customer. If detailed information on the possible tolerances is required (e.g. cavity production for metal parts), please contact your local Swarovski sales office who will enter an application request into our application database.

CRYSTAL MEDLEY

SPECIAL MOTIF SERVICE

A special motif is a design created by the customer that differs to the Crystal Medley Standard Collection. This service opens up an abundance of customization possibilities and enables you to profit from Swarovski's long-standing experience and design expertise. A range of customization options for existing motifs is available (see "Customization Possibilities" below). You can also submit design

sketches that meet your special needs, such as a brand image or an image for a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which means that adjustments can be made easily according to your needs.

Customization Possibilities for Crystal Medley

- Min. size: 19x19 mm or effective surface of 3.61 cm² ¹
 - Max. size: 400x330 mm
 - Min. Crystal Medley surface: 9 mm
 - Min. width of gaps within motifs: 7x7mm or effective surface of 0.49 cm²
 - Min. gap between motif outlines: 6 mm
- Due to production requirements, motifs with edges and angles of less than 90° need to be rounded off. Tolerance value = 1.5 mm.

Two-colored motifs

Customers are able to create a combination from out of the Crystal Medley standard color assortment (e.g. large double-pointed

Chatons and small double-pointed Chatons in 001 AB and the round uncut elements in 001 CAL).

Ordering Process

Send your request with the drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements for the desired motif. Please also indicate which product group your special motif applies to (Crystal Medley). You will then receive a quotation including your article number,

minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes need to be made. Your special motif will be produced and delivered following your confirmation.

Please Note

Please always submit the drawing of your desired motif to represent it in the actual size you require. A small sketch, when enlarged to the desired size, will have blurred lines that will make it difficult to correctly reproduce. Pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP, or DXF format will ensure that we have clear data to work with. These can also be sent via email or on CD-ROM. If sending a sewing pattern, please include the whole pattern and not just sections. When the sketch is submitted as a hard copy by fax or email, please include a scale legend (e.g. copy/scan with a ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

It is generally possible to draw motifs with a minimum gap of 10 mm between the outlines. However, due to the tolerance level of the crystals being applied onto carrier film, the final Crystal Medley motifs may differ from sketches or prints in relation to the motifs' outline, especially with regards to spaces that are smaller than 10 mm. Therefore the motif, and by extension, the product itself, may be subject to individual variations with each

reproduction. These variations are caused by technical production-related factors. As these variations are not deemed to be defects, warranty claims are excluded and Swarovski assumes no liability whatsoever in connection with them.

Special productions are generally offered to all our customers if these are deemed to be feasible and comply with our General Terms and Conditions. Please note ordering of a design does not grant exclusive production of this design to the customer.

If detailed information on the possible tolerances is required (e.g. cavity production for metal parts), please contact your local Swarovski sales office who will enter an application request into our application database.

For detailed application information, please refer to the Application Manual and our business website SWAROVSKI-PROFESSIONAL.COM or contact your Swarovski sales office.

¹ Min. size 17x17 mm (or effective surface of 2.89cm²) is possible for customized motifs. Please note: with this reduced minimum size, we cannot guarantee that there will be at least one PP 29 double-pointed Chaton on every motif.
