**DESCRIPTION**

It contains a straight and vertical filament that, when you shake the bulb, detaches from one side, rests on the glass and takes on ever-changing shapes. It's as if the bulb itself comes to life, offering an interactive lighting experience. Every time it is turned on, a new light appears. The smoked glass means that when the bulb is turned off, the glass looks gray and elegant, but when the light is turned on the magic begins.
